

Clax Cart German Engineered Light, Compact, Collapsible Trolley

The Clax Cart is a Lightweight 2 Tier collapsible trolley that also has the added benefit of quick release wheels and castors that neatly slot into the underside of the bottom tray to make the unit even more compact.

The folding mechanism is controlled by the simple push of a button located on the centre of the push handle allowing the trolley to collapse flat. This same button also controls the position of the handle that can be towards the operator (pictured), 90 degrees to the base/Vertical or away from the operator for control at the opposite end of the trolley.

Supplied Standard with one 46 litre basket that also has the ability fold completely flat and can be secured to the trolley with clips attached to elastic straps that are located under the top tray. Additional baskets can be purchased separately.

The top tray can also fold up and out of the way leaving you with a single level platform trolley.

A foot operated brake is also provided to stop the trolley from unexpectedly rolling away.

These carts are often used in Hospitals, Nursing Homes, Offices, Apartments and Households, finding many uses in each environment, there is no limitation to what the Clax Cart can do for you.
