## NUMATIC Housekeeping Trolleys – Housemaid carts

### Numatic SKAT 17 Servokeeper Housekeeping Trolley

Each and every NuKeeper application has its own needs and requirements. The NuKeeper NKL models incorporate all of the professional design features of the NuKeeper range but are sized to suit small to medium sized establishments.

The NKL series are all based on our Hi-mobility AT chassis, incorporating 200mm soft ride castors and all round bump protection.

- Full size centre module
- Large wheels with brakes
- 2 x 100 litre grey external bags
- Pull down courtesy cover
- 3 pull out storage containers

#### **Models Available**

**NKL17FF** Flexi Front with hideaway front cover (*Shown*)

**NKL17HF** Hard Front cabinet design

**Dimensions:** 1510L x 580W x 1100mm

**Weight:** 29kgs

### Numatic SKAT 22 Servokeeper Full Size Housekeeping Trolley

The full size SKAT20 series of housekeeping trolleys have been developed by Numatic to cope with the biggest of hotel operations but are of course equally at home in hospitals and larger nursing homes.

- Three large shelves and a five-drawer storage system keeps everything neat and tidy
- Integrated 'Nite' cover keeps things secure and out of sight when required.
- Tough and durable, with full 'Structofam' base units and large 'all-terrain' wheels,
- Built for the task in hand and will perform day in, day out, whilst remaining unobtrusive.
- Bags incorporate drag handles and top closure system and are easily removed from the trolley as necessary and are interchangeable with bags from the Servo-X and Servo-Bag systems to give a truly uniform and co-ordinated system
- Optional bag kits can be added to smaller models to increase capacity if required.
- SKAT-22, 3-shelf, 5-drawer, twin 100-litre bags

#### **Models Available**

**NKT22F** Flexi Front with hideaway front cover (*Shown*)

**NKT22HF** Hard Front cabinet design

**Dimensions:** 1820L x 580W x 1410H mm.

**ProHost® is the first** material handling and distribution System designed specifically for hotels and resorts. A dynamic management tool, the ProHost® System works to improve productivity, quality standards and inventory control. The System delivers operating efficiency, enhances guest corridor appearance and improves employee morale.

**The Challenge**

Hotel owners and managers operate in an environment that demands increased efficiency and productivity. At the same time, they must meet their customers' needs for high levels of quality and service. In front-of-the-house operations, these two objectives are being met through the use of new system technologies. The ProHost® System, from Hostar International, provides management with the technology to meet these goals in the heart-of-the-house.

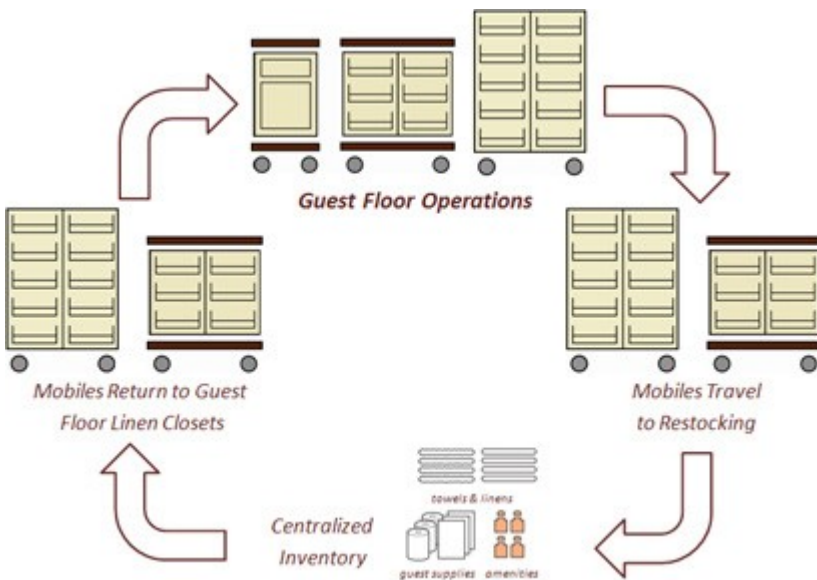

**The System**

The ProHost® System combines process, methodology and smart equipment to ensure seamless, just-in-time delivery of finished linens and supplies to the guest floors. The integrated equipment is an ensemble of power assisted and non-powered Mobiles and Totes that carry program-loaded quantities matched to each floor and section. Each System is customized to fit the physical layout of the hotel. The process is designed to complement the operational goals and objectives of management.

**Productivity**

The ProHost® System sharply reduces material handling requirements. System clients report that room attendants can complete daily assignments 30 to 40 minutes faster using the ProHost® System. The time that room attendants had previously devoted to loading and handling activities can be redistributed to gain greater employee productivity and enhance guest services.

**Quality for the Hotel Guest**

ProHost® is the first System to provide total separation of clean and soiled items. Soiled linen and trash remain out of the guest's view at all times. The System delivers accurate and consistent quantities to each section on a 24-hour par level basis. The result is improved productivity and quality within the guest room and more time for the room attendant to focus on service to guests.

**Financial Payback and Savings**

The improved productivity generated by the System yields significant long-term savings. Additional savings from expense reductions are realized through centralization and just-in-time inventory capabilities. The ProHost® System typically pays for

itself in **less than two years in new hotels and in two to three years in existing properties.**

The ProHost® Luxury/Boutique Program maintains a “cartless appearance” in the guestroom corridors while providing room attendants with a tool to significantly improve productivity and guest room quality.

Room attendants are provided with pre-loaded Handy Suppliers, sized to go inside the guestroom, containing exact quantities of amenities, room supplies and cleaning products for a daily assignment. Suppliers or Tote Carriers are specified to carry daily quantities of linen and towels to the linen closets.

HANDY SUPPLIER

TOTE CARRIER FOR RESERVE LINEN

**ORGANIZATION**

The ProHost® Handy Supplier organizes tools, linen, and supplies while maintaining a minimal profile in guest areas. Slim enough to go into guestrooms during the room cleaning process, it allows housekeeping programs to be truly invisible.

The ProHost® Luxury/Boutique Program delivers first-class appearance, consistent quality and improved productivity for five-star housekeeping operations. For more information on how the ProHost® System can positively impact your hotel or resort, contact Hostar International, Inc.

*Hotel owners and managers operate in an environment that demands increased efficiency and productivity. They must also meet their customers’ needs for high levels of quality accommodation and service. The ProHost® System provides management with the technology to meet these goals in the heart of-the-house.*
