NOTICE

REMOVE SECURITY BOLLARDS BEFORE RAISING DOOR

S1228-PP 225 X 300

\* We highly recommend the use of post holders for the storage of idle posts.

**Cam-lok model BCLRD** is a key operated, removable bollard post designed for warehouse roller door protection. Supplied with a heavy duty door assembly, the post actually locks the door down to the ground, thereby offering maximum security against ram-raiding or levering-up of the door. The post locks into a steel in-ground sleeve via an internal locking system using high security cam locks with registered keys. (2 supplied per order)

### Value Features

- \* 90mm diameter post with 5mm thick wall.
- \* Post locks into a steel in-ground sleeve.
- \* Internal locking system using high security cam locks, with security registered keys. (2 supplied per order)
- \* In-ground sleeve supplied with hinged hole cap for pedestrian safety.

PART No.	DESCRIPTION

**Cam-lok model BCL** is a key operated, removable bollard post. It is designed for ram raid protection of shop fronts etc., or anywhere that unwanted vehicle access is a problem. Available in either 90 or 140mm diameter.

The heavy duty post locks into the steel in-ground sleeve via an internal locking system using high security cam locks with registered keys. Cam-lok is used extensively throughout the automotive trades. Cam-lok is the benchmark product of its type on the market. Its use is heavily supported by leading insurance companies.

### Value Features

- \* Available in two sizes 90 or 140mm diameter.
- \* Post locks into a steel in-ground sleeve.
- \* Can be installed into existing or new concrete, bitumen or gravel.
- \* Internal locking system using high security cam locks, with security registered keys. (2 supplied per order)
- \* In-ground sleeve with hinged hole cap for pedestrian safety.

\* We highly recommend the use of post holders for the storage of idle posts.
