

Akro-Mils Roto Shelf

Ideal for storage and quick retrieval of assembly components. Four shelves, each with six compartments, rotate on an independent central metal shaft. Shelves are 500mm in diameter, 55mm deep, and can hold up to 34kg's each

They are constructed of heavy-duty structural foam to hold tools, parts, and equipment. Industrial-strength wheels provide easy movement. Mobile storage unit can easily be taken with you as you move to different work areas.
